PROFILE

Computer Science student at the University of Engineering and Technology, Lahore, with hands-on experience in frontend and backend development. Proficient in HTML, CSS, Bootstrap, C, C++, and C#, applying Object-Oriented Programming principles across web, desktop, and AI-powered applications. Projects include a database-connected AI assistant, a camera-based number plate detection app, an AI resume generator, and a real-world e-commerce website. Seeking internship and entry-level Software Developer opportunities.

SKILLS

Languages & Core	**HTML CSS Bootstrap C C++ C# OOP**
Development	**Frontend Development Backend Development Web Design Responsive Design WPF Blazor AI Integration Git**

EMPLOYMENT

Coder | *Arfa Software Technology Park, Lahore, Punjab* Jun 2024 – Sep 2024

- Gained hands-on training in frontend and backend development, building a foundation in HTML and CSS for responsive design alongside C, C++, and C# backed by core OOP principles.
- Designed and developed a shopping website project end-to-end, applying coding and UI/UX design skills to deliver a functional e-commerce solution.

PROJECTS

AI Copilot for ERP | *Professional Project* 2026

- Built an AI assistant connected to a company database that answers natural-language questions using the information stored in that database.
- Developed with C#, WPF, and Blazor as part of a professional software project.

Number Plate Detection | *Personal Project* 2026

- Developed an application that opens the camera, detects whether a number plate is present in a shown image, and reads out the plate number when one is detected.
- Built as a Windows desktop application in C# with a live camera feed.

AI Resume | *Personal Project* 2026

- Built an application that collects a user's details through a form and generates a resume automatically using AI.
- Built as a Windows desktop application in C#.

Banking Management System | *Personal Project* 2024

- Developed a console-based banking application in C++ applying OOP concepts (classes, encapsulation, inheritance), covering account creation, deposits, withdrawals, and balances.
- Rebuilt the core logic in C# to reinforce OOP principles across languages.

Saphire E-commerce Website | *Practical Project* 2024

- Designed and developed a responsive shopping website blueprint using HTML, CSS, and Bootstrap with a clean, mobile-friendly layout.

Employee Management System | *Personal Project* 2024

- Built an employee records application in C++ using OOP principles and structured, maintainable code.

EDUCATION

Bachelors in Computer Science | *University of Engineering and Technology, Lahore* 2025 – Present

Intermediate in Computer Science | *Kips College, Lahore* 2023 – 2025

Matriculation in Science | *Allied Schools, Multan* 2021 – 2023

Course: Web Development 2024
